Profile Summary

Final-year B.Tech student with hands-on experience in product discovery, customer research, product strategy, MVP definition, and technology-driven product development. Experienced in translating user problems and customer feedback into product decisions, prioritizing MVP scope, and working across business and technical constraints.

Education

- **B.Tech – Artificial Intelligence and Data Science** **CGPA: 7.32**
  Amrita Vishwa Vidyapeetham, Bengaluru 2023–Present

Skills

- **Product:** Product Discovery, Product Strategy, Problem Framing, User Research, MVP Definition, Product Prioritization, Hypothesis Formation, Stakeholder Coordination
- **Design & Analytics:** Figma, Wireframing, User Flows, Rapid Prototyping, SQL, Data Analysis, Excel, Google Sheets
- **Technical:** Python, FastAPI, REST APIs, MongoDB, Git, GitHub, Machine Learning, Recommendation Systems
- **Methods:** Agile, Scrum, SDLC

Projects

- **Smart Fit Frames | Product Discovery & Product Strategy** 2025
  - Identified a fabric-retail problem where buyers struggled to visualize how plain fabric could look as a finished garment.
  - Approached approximately 20–30 fabric owners with an early prototype and synthesized feedback on format, customization, durability, and visual clarity.
  - Translated feedback into product decisions including a 12 × 16-inch acrylic format, white background, and garment-specific designs.
  - Defined the MVP around a simple physical visualization aid and contributed to product strategy, requirements, and stakeholder coordination; product reached commercial launch with approximately INR 6 lakh in reported revenue across six months.
- **Concord | 0→1 Product Strategy** 2026
  - Developed a 0→1 product strategy for an AI-powered group travel consensus layer focused on resolving conflicting preferences and adapting plans as conditions change.
  - Framed the problem around hidden constraints, decision fatigue, and difficulty reopening group decisions rather than itinerary generation alone.
  - Defined target users, JTBD, product hypothesis, positioning, agent workflow, and human-control principles for consequential decisions.
  - Prioritized an MVP around private preference capture, conflict detection, trade-off explanations, approvals, decision history, and change-impact alerts, with metrics and a phased roadmap.
- **StyleMate | AI Personal Stylist & Recommendation System** 2026
  - Identified decision fatigue among college students choosing daily outfits and defined an AI-powered product using users' existing wardrobes.
  - Defined the MVP workflow across digital wardrobe creation, clothing attributes, outfit generation, alternative recommendations, and outfit history.
  - Built backend product workflows using Python, FastAPI, MongoDB, and REST APIs to manage wardrobe data and recommendation operations.
  - Developed an outfit-scoring framework using color harmony, styling consistency, occasion suitability, footwear compatibility, and recent wardrobe usage to rank recommendations.

Certifications

- **Project Management Assessment** — LearnTube.ai July 2026
- **Machine Learning Assessment** — LearnTube.ai July 2026

Leadership & Activities

- Organized local cricket tournaments end-to-end, coordinating teams, schedules, logistics, stakeholder communication, and live event execution.
- Active member of the college cricket team, demonstrating teamwork, collaboration, and performance under pressure.
