PROFILE SUMMARY

Aspiring Product Manager with hands-on experience in customer discovery, MVP development, and product strategy. Contributed to a commercial product with approximately **6 lakh in reported revenue over six months**, using feedback from **20–30 fabric owners** to inform product decisions. Combines customer-centric problem solving with technical fluency across AI products, APIs, and databases.

EDUCATION

B.Tech. in Artificial Intelligence and Data Science 2023 – Present
Amrita Vishwa Vidyapeetham, Bengaluru CGPA: 7.32/10

PRODUCT EXPERIENCE & PROJECTS

Smart Fit Frames *Customer Discovery & Product Strategy*

- Investigated fabric buyers' difficulty visualizing finished garments and gathered feedback from approximately **20–30 fabric owners** using an early product prototype.
- Translated feedback on visual clarity, customization, format, and durability into product decisions, including a **12 × 16-inch acrylic frame**, white background, and garment-specific designs.
- Contributed to product documentation, stakeholder coordination, and commercial execution; the product reportedly generated approximately **6 lakh in revenue over six months**.

PlanAB – Group Travel Decision Assistant *Product Strategy & Prototype*

- Framed group-trip planning around hidden constraints and costly renegotiation; designed a decision-support concept that helps groups reach explicit agreement and revisit affected decisions when plans change.
- Mapped workflows for private preference capture, conflict detection, trade-off explanations, group approvals, and itinerary changes.
- Defined human-control boundaries, a consensus-based North Star metric, go-to-market hypotheses, and a validation roadmap; demonstrated a prototype with voice interaction.
- Reported among the **top 7% across three rounds** of The Ken's The Great Rewiring case competition. Booking, payment, and logistics flows remained simulated or unconnected.

StyleMate – AI Personal Stylist *0-to-1 Product Development*

- Identified outfit-selection friction among college students and scoped an MVP around users' existing wardrobes rather than new purchases.
- Built backend workflows using **Python, FastAPI, MongoDB, and REST APIs** for wardrobe management, outfit recommendations, alternative suggestions, and outfit history.
- Developed an outfit-scoring framework covering color harmony, styling consistency, occasion suitability, footwear compatibility, and recent usage; added history-based logic to deprioritize recently worn items and improve recommendation variety.

SKILLS

Product: Product Discovery, Problem Framing, User Research, MVP Definition, Prioritization, Product Strategy, Product Requirements, Success Metrics
Analytics & Design: SQL, Data Analysis, Excel, Google Sheets, Figma, Rapid Prototyping
Technical: Python, FastAPI, REST APIs, MongoDB, Git, GitHub, Machine Learning, Recommendation Systems
Methods: Agile, Scrum, SDLC
